Biography:

Dr. Park is actively performing gastric cancer and bariatric surgeries with many experiences of minimally invasive surgeries such as laparoscopic, robotic or single port gastrectomies. He has strong interest in minimally invasive function preserving surgery in early gastric cancer. He is participating in many important clinical studies such as KLASS (PI of KLASS 5: Phase III trial for laparoscopic proximal gastrectomy versus total gastrectomy for upper early gastric cancer), REGATTA, sentinel node, etc. He plays an important role in many Korean or International societies. His translational research interest is gastric cancer angiogenesis.
