

The 95th Annual Scientific Meeting of
the Korean Society of Anesthesiologists

Patient-centered Anesthesia
“One-step Ahead”

November 8 -10, 2018
Seoul Dragon-City Hotelplex
Seoul, Korea

Webpage

Welcome Message

Dear colleagues,

This year the 95th KoreaAnesthesia 2018 will be held as an international symposium for 3 days from November 8 (Thu) – 10 (Sat) at Seoul Dragon City hotel.

We invited the foreign speakers in each field to hear the latest knowledge in anesthesiology under the catchphrase of ‘Patient-centered anesthesia: One step ahead.’ Our society will also host the East Asian Congress of Anesthesiologists (EACA) during the same period, thereby interacting with the Japanese Society of Anesthesiologists and Chinese Society of Anesthesiology. In addition, members from various countries will participate in this symposium thanks to the MOU signed with overseas societies since 2017.

We have prepared various events during the symposium including the refresh program on Thursday morning and dualized training for residents, and have diversified the workshops and simulation programs, while also making many other preparations including simultaneous interpretation to promote active participation of members and increase options for them during the symposium.

We hope the international symposium consecutively held this year again can provide a venue for our members to interact and bond globally. We think this is the right direction to expand externally while also securing internal stability.

Finally, we would like to thank the committee members including the director of academy, executive directors, speakers and chairpersons for their efforts in preparing this conference as an international symposium. We would also like to thank once again our business partners for their cooperation in the development of our society despite the tough circumstances.

We hope the KoreaAnesthesia 2018 is held in success, and we look forward to your active participation.

Thank you.

President of the Korean Society of Anesthesiologists
Il-Ok Lee, MD, PhD

Key Invited Speakers

Airway management

Takashi Asai

Dokkyo Medical University Saitama Medical Center, Japan

- Difficult Airway Management - the Current Method is not Ideal
- Airway Management in Obese Patients

Professor Takashi Asai, graduated at a Japanese university (Kansai Medical University) in 1987, and obtained doctor of philosophy (PhD) degree at a British medical university (University of Wales College of Medicine (currently Cardiff University)) in 1997, is a professor of a Japanese university (Dokkyo Medical university), as well as an international societies of anaesthesia (Difficult airway society) faculty professor. His area of interests includes airway management, gut function, statistical analysis, ethics, and medical history. He is an editor of several journals (including British Journal of Anaesthesia), and has published more than 500 articles and textbooks, and has given lectures more than 150 times.

Airway management

Barry McGuire

Ninewells Hospital, UK

- Indirect (Video) Laryngoscopy vs. Direct Laryngoscopy
- High Flow Nasal Oxygenation

Barry McGuire is a Consultant Anaesthetist at Ninewells Hospital and Medical School, Scotland. He trained in anaesthesia in the Scotland and Australia and has particular interest in anaesthesia for Head and Neck surgery, advanced airway management, paediatric anaesthesia and critical incident reporting. Barry is the current Honorary Secretary of DAS(Difficult Airway Society) and founded the Scottish Airway Group. Barry has published on airway management and has spoken at national and international meetings. However, his real passion involves two wheels.

Abstract Submission

Abstract Submission Period Extended! (~July 31)

Abstract submission period has been extended until July 31st to ensure the best abstracts are submitted from each applicant.

Categories

- Anesthetic Safety and Complications
- Anesthetic Monitoring/Engineering
- Anesthesia Pharmacology
- Anesthesia Pharmacology-Neuromuscular function
- Critical Care
- Hemodynamics, Fluids, Transfusion, and Coagulation
- Ambulatory Anesthesia
- Obstetric Anesthesia
- Cardiovascular Anesthesia
- Thoracic Anesthesia
- Anesthesia for Transplantation
- Pediatric Anesthesia
- Geriatric Anesthesia
- Regional Anesthesia and Acute Pain
- Chronic Pain
- Others

Abstract Submission

Travel Grant

Application Deadline : July 31

The KSA is providing scholarships for trainees(residents and fellows) and recently certified anesthesiologists (board certified between 2015-2018) that are planning to attend KoreAnesthesia 2018.

Application Submission

Please upload the following documents when you're applying travel grant.

1. Application Form (PDF format)
2. Curriculum Vitae with your recent Photo (MS word format)
3. Reference Letter from your Anesthesia Society or your Chief/Head of Anesthesia Department (PDF format)
4. Scanned Copy of your Medical Degree or Medical License (PDF format)

Registration

Early-bird Registration Grand Open ! (~ July 31)

Registration is now open for the KoreAnesthesia 2018 !
Register today to learn, network, and catch up with your colleagues.

Main Program

Classification		Early-bird Registration (~July 31)	Pre-Registration (~Sep 30)	On-site Registration (Nov 8~10)
◆ PHYSICIANS				
Group A * Bangladesh, Cambodia, Indonesia, Laos, Mongolia, Myanmar, Nepal, Vietnam	Board-certified Anesthesiologists	FREE	\$50	\$100
	Trainees (Fellows & Residents)	FREE	\$30	\$50
Group B * Other countries except Group A	Board-certified Anesthesiologists	FREE	\$100	\$200
	Trainees (Fellows & Residents)	FREE	\$50	\$100
◆ NON-PHYSICIANS				
Nurses		FREE	\$40	\$60
Medical Students		FREE	FREE	FREE
◆ ETC				
Exhibitors		\$55	\$65	\$75

Workshop

Workshop registration is operated on a first-come, first-served basis.

◆ Workshop 1 : Thoracic Anesthesia	◆ Workshop 7 : Simulation Instructor Course
◆ Workshop 2 : TTE Basic	◆ Workshop 8 : ROTEM Wet-Lab Simulation
◆ Workshop 3 : Airway Management & Vascular Access	◆ Workshop 9 : Asan Pump Simulation
◆ Workshop 4 : Echo Advanced	◆ Workshop 10 : TEE (Vimedix Simulator-based)
◆ Workshop 5 : Point-of-care US	◆ Workshop 11 : Transfusion
◆ Workshop 6 : Ultrasound-guided Nerve Block	◆ Workshop 12 : NONMEM
